# AUXILIUM

Auxilium. An application framework designed for museums to offer visitors the ability to learn more about your exhibits via audio narration, video presentations, guided tours, augmented reality and much more.

AUXILIUM

# LET YOUR EXHIBITS TELL THEIR OWN STORY

Using image recognition technology, a visitor can simply point their device at an exhibit, and an audio commentary is ready to play. This leaves the visitor able to learn about the exhibit while still studying it, instead of having to read a discription on a plaque, causing them to divert their attention away from the actual exhibit.

## EACH EXHIBIT. MULTIPLE LANGUAGES

The Information about your exhibits can be in multiple lanhguages.

Enabling a near unlimited number of visitors and users access to your entire collection.

## AUDIO IS JUST THE BEGINNING

A video presentation can also be played giving a wider context to what is being displayed. The recreation of a battle, or a historian explaining in detail what is on display, and guiding a viewer to look at certain aspects of an exhibit they may otherwise miss or give a greater understanding.

## REMOVE THE BARRIER BETWEEN VISITOR AND EXHIBIT

With your app, a visitor can get closer to an exhibit than ever before. Your exhibit can be digitally recreated. Allowing your visitor, for example to be able to zoom into a painting close enough to see the individual brush strokes made by the artist. Or be able to look at an object as if it was in their own hands.

AUXILIUM

# YOUR APP, TAILORED TO YOUR BRAND

Your app is designed to seamlessly integrated with your existing brand identity. We work alongside you to create the look that matches your organisation in exact detail.

## AND IS YOURS FOREVER

Once you take delivery of your app. It is yours for as long as you want to use it. There are no hidden subscriptions, no mandatory contracts.

An entire year of 24/7 customer support, along with free updates and revision is included. If and when you want to add a new exhibit, just call and we'll happily add it you your app.

AUXILIUM

## FEATURES

Audio & Video Commentary

Guided Tours

Children's Games & Activities

and much more.

AUXILIUM

# AUDIO, VIRTUAL & AUGMENTED TOURS

## How it works

Visitors download your app.

Scans code, description plate, or exhibit itself.

Audio commentary plays automatically, with optional descriptive text, along with video presentation available in multiple languages.

Visitors can be guided to another exhibit in sequence or allowed to browse at leisure.
